

TOBIAS LEE, MD, FACC

“Every patient deserves the most advanced cardiovascular care based on scientific evidence. Every patient should also be treated like family.”

Dr. Lee enjoyed his year as Chief Medical Resident when he was supervising and teaching both medical students and junior physicians in the art and science of medicine. “I am thrilled to be a part of a discipline that changes so rapidly and challenges me daily to pursue lifelong learning.”

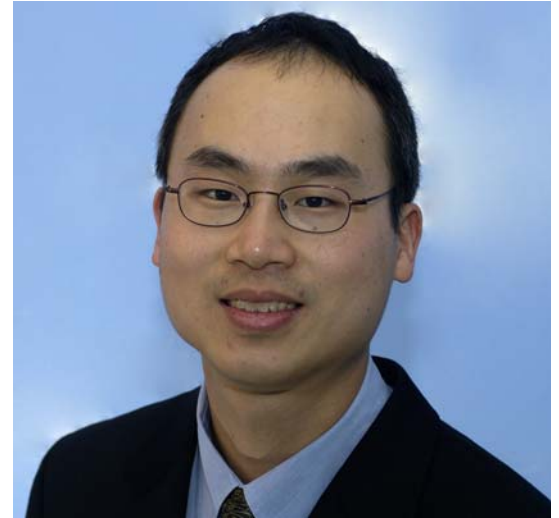

Dr. Lee particularly enjoys spending time educating his patients so that they can better understand and be active participants in their own health issues.

“I grew up in Washington State and spent 16 years on the East coast for college and my medical training. My wife, three boys, and I look forward to spending our free time outdoors biking, hiking, fishing, and camping. I am an avid photographer. I’m delighted to be back in the beautiful Northwest.”

Ferry by Tobias Lee

Board Certified in Cardiovascular Disease
Board Certified in Interventional Cardiology

POST DOCTORAL TRAINING

- Harvard Medical School, Boston, MA
Beth Israel Deaconess Medical Center
Fellowship in Interventional Cardiology & Peripheral Interventions 2005 - 2006.
- Harvard Medical School, Boston, MA
Beth Israel Deaconess Medical Center
Fellowship in Cardiology 2002 - 2005.
- Boston University School of Medicine
Boston Medical Center, Boston, MA
Chief Medical Resident 2001 - 2002.
- Boston University School of Medicine
Boston Medical Center, Boston, MA
Resident in Internal Medicine 1999- 2001.
- Boston University School of Medicine
Boston Medical Center, Boston, MA
Intern in Internal Medicine 1998 - 1999.

EDUCATION

- Yale University School of Medicine. *M.D.*
New Haven, CT 1994 - 1998.
- Harvard College. *A.B. Cum Laude.*
Cambridge, MA 1990 - 1994.
- Lakeside High School.
Seattle, WA 1986 - 1990.

SELECTED HONORS AND AWARDS

- American College of Cardiology Foundation Affiliate Award. 2004.
- Best Thesis in Transfusion & Laboratory Medicine. 1998.
- AOA Honor Medical Society Student Research Fellowship. 1996.
- Farr Scholar Award for Superior Performance as a Medical Student and for Leadership, Integrity, and Intellectual Honesty in Pursuit of Knowledge. 1996.

SELECTED PUBLICATIONS

- Lee, T.T., L. Feinberg, *et al.* 2006. The Effect of Diabetes Mellitus on Five Year Clinical Outcomes after Single Vessel Coronary Stenting. *American Journal of Cardiology.* 98: 718-721.
- Lee, T.T., J. Chen, *et al.* 2006. The Association between Blood Pressure & Mortality in Heart Failure Patients. *The American Heart Journal.* 151: 76-83.

CLINICAL EXPERIENCE

Dr. Tobias Lee enjoys the field of cardiovascular medicine because of the many advances and treatment options available for any condition. “The most rewarding aspect of cardiology is to be able to find the best diagnostic test or treatment plan for every patient.” When medicines alone are not enough, Dr. Lee has the additional training required to treat patients with serious coronary artery disease using angioplasty, stents, and other techniques. He is also trained in noninvasive and invasive vascular medicine and is experienced in treatment of peripheral arterial disease using both medicines as well as more aggressive approaches. Dr. Lee brings his experience of over 1,000 successful coronary and peripheral vascular procedures performed at Harvard Medical School to the patients of the Cardiac Study Center.
